

The **FIRST & ONLY** Driving Recorder Series with these **Safety Features!**

Only in
PAPAGO!

Stop & Go Alert

Alert you to go when the front vehicle has moved. This will be activated when you stop driving for 10 seconds.

Only in
PAPAGO!

Light reminder

Remind you to turn on headlights when you are driving in the dark.

Only in
PAPAGO!

Driver Fatigue Alert

A timer can be set to remind the driver to rest after certain hours of driving.

Motion Detector (required power supply)

Enter motion detection mode after 1 minute without movement. GoSafe 310 starts recording when it detects something moving within the range.

Recording Features

HD 1080p 30fps

GoSafe310 is using Ambarella's chip that allows it to capture videos in HD 1920 x 1080p at 30fps. The pristine recorded video will be the strong proof if any accident happens.

107° Wide Angle Lens

Vehicles from right side and left side can be clearly recorded with the 107 degree wide angle lens from GoSafe310. Every angle from the front view even blind sides will not be missed.

Mini & Compact

Features a mini size design (7x5, cm), you would hardly notice its existence. The T-type 3M buckle allows it to be easily removed and kept.

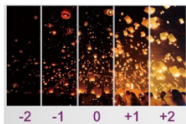

Excellent Night Vision

GoSafe310 is equipped with f/2.2 lens aperture, therefore GoSafe310 performs better night recording!

5 levels of Exposure Value (EV)

You can adjust the setting of exposure value to deal with overexposure or low light situation for better quality video recording.

LCD Screen (2")

Allow instant video playback.

G-sensor

Automatically backup the video to avoid overwriting when it senses the sudden force on the driving recorder.

10 sets of Emergency Files

Press on the emergency button to save one minute before and after of the important scenes into separate folder and they won't be overwritten. You can store up to 10 sets of emergency files.

Auto recording upon power on

Non-stop loop recording. Videos will be overwritten when the memory is full.

Environmentally Safety Design

GoSafe310 has a built in temperature sensor which will automatically enter a protected mode if the temperature climbs too high or drops too low and the unit will shut down the system to prevent any damage to the unit. Therefore it extends the lifespan of the device.

Direct HDMI Output

High quality video output.

Support USB 2.0

It is easy to back up the recorded videos into your computer via USB.
